AWS Config Resource Compliance Dashboard

Shift-left your compliance strategy and empower configuration management on AWS

AWS Config

A "single pane of glass" for tracking AWS resource inventory and compliance status across multiple AWS accounts and regions using AWS Config data – powered by Amazon QuickSight

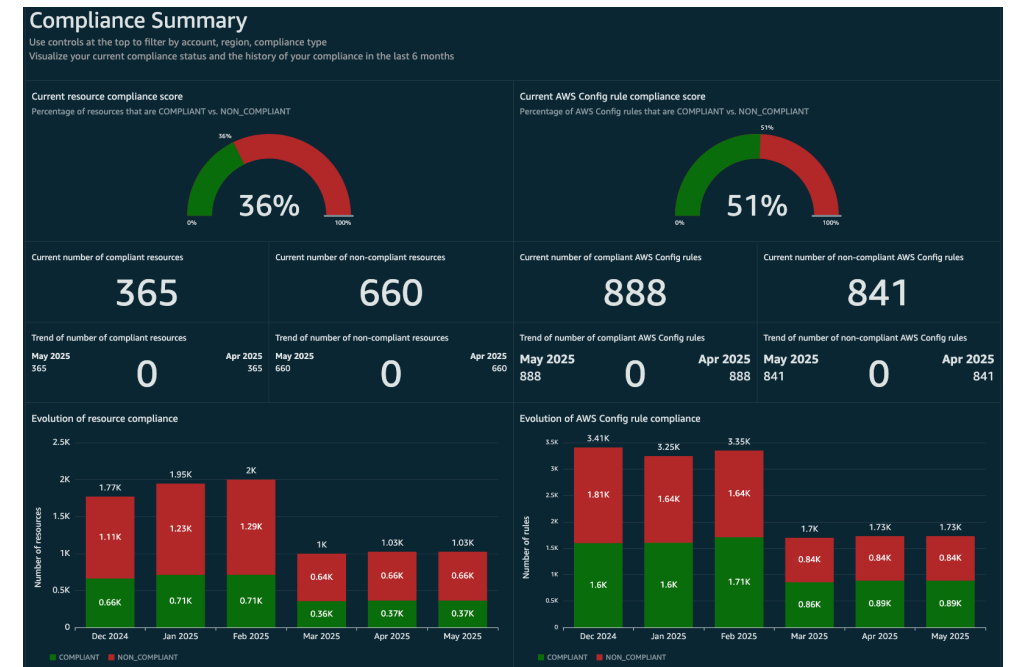

Advantages

1. Democratize compliance visibility
2. Shift-left security and compliance processes
3. Simplified Configuration Management on AWS

Features

1. At-a-glance compliance status of resources, AWS Config rules and conformance packs; validate enterprise-wide tagging requirements
2. Compliance breakdown by service, account, and region; monthly evolution of compliance
3. AWS resource inventory management with business tags support
4. Configuration item events; validate AWS Config coverage
5. Leverage QuickSight row-level security to restrict access to data
6. Compatible with AWS Organizations and standalone accounts
